Question 1

Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {
{
   for (i = 1; i <= num;++i)
   {
    if (num % i== 0)
       {
         printf("%d ", i);
       }
    }
 }
```

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer:

Reset answer

```
#include<stdio.h>
int c=0;
void Factor(int n) {
    int i=0;
    c++;
 {
    for (i = 1; i <= n;++i)
    {
    c++;
        c++;
     if (n% i== 0)
        {
            c++;

        }

```

```
        }

    }
}

int main(){
    int n;
    scanf("%d",&n);
    Factor(n);
    printf("%d\n",c);
}
```

	Input	Expected	Got	
✔	12	31	31	✔
✔	25	54	54	✔
✔	4	12	12	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
